learning to change the world

Understanding Social Enterprise

10am - 4pm | 19 October 2012

Re-Union Canal Boats, Fountainbridge, Edinburgh

Social enterprise is a new model of business that combines the best of business with clear and purposeful social aims.

Understanding Social Enterprise is aimed at community food initiatives that want to learn more about social enterprise and the potential it offers.

Participants will have the opportunity to explore this dynamic business model, with an insightful case study visit to an established and successful social enterprise, and discover opportunities for their organisation.

You will:

- Learn about the values and purposes of social enterprises, their organisational and legal structures, finance and support
- Develop your ability to manage a triple bottom line and create an action plan to apply your learning
- Meet like-minded people interested in making their communities more sustainable

Participants

There are twelve places available which are all fully-funded.

This programme is for people working with community food initiatives who are interested in developing more enterprising ways of working.

The costs of the programme are being met by the Social Enterprise Academy and Community Food and Health Scotland.

Book your place

Please contact Community Food and Health Scotland:
